

You create a quota unit group, called People Search. A quota unit group contains one or more quota units.

You create a quota unit, called Search and attach it to the People Search quota unit group.

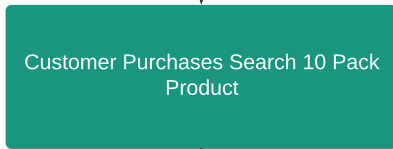

You create a product called Search 10 Pack and attach the Search Quota Unit to it. You set the unit amount to 10.

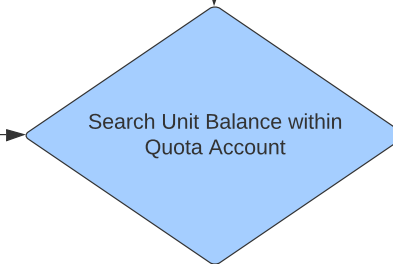

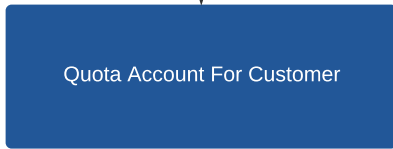

The unit amount is set to 10. When a customer purchases this product their quota account will be credited 10 Search units.

A new customer signs up with your service and conducts an initial sale with the Search 10 Pack Product

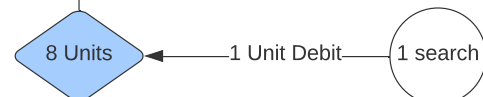

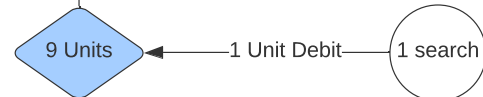

If New Customer

A quota account is created for a new customer or if an existing customer does not have a quota account for the parent quota unit group. If the customer exists and has a quota account a new account would not be created.

A balance for the Search Unit is kept within the customers' quota account.

Quota Account Debits

The customer purchases another 10 pack. The quota account unit balance for the customer is credited 10 units
