

You create a usage profile, called Video Streaming Profile with two tiers. A unit is considered a minute of streaming and billing is set to monthly. Tiered type is Multi Tier.

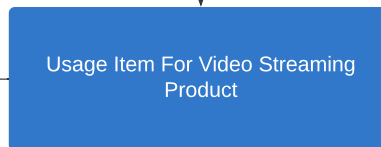

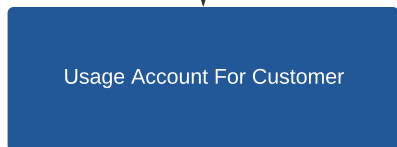

You create a product called Video Streaming Product and attach the Video Streaming Profile to the product.

A customer signs up with your service and purchases the Video Streaming Product

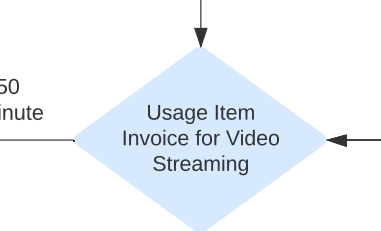

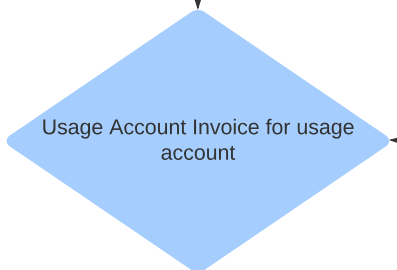

A usage account is created for the customer as a result of a usage product purchase.

A usage item is created for the customer specific to a product, in this case the Video Streaming Product

Monthly Billing Period

Tier 1: 100 minutes @ flat rate 50
Tier 2: 30 minutes @ .10 per minute
